

CAREER OBJECTIVE

- I'm a Computer Science engineering student with strong interest in Java, Cloud Computing, and DevOps. Seeking an entry-level opportunity to apply my technical skills, gain industry experience, and contribute to building reliable and scalable software systems.

EDUCATION

- Alliance University** Bangalore, India
Bachelor of Engineering - Computer Science; CGPA: 8.1 September 2023 - June 2027
Courses: Operating Systems, Data Structures, Analysis Of Algorithms, Databases, Computer Architecture, Fundamentals of OOP's using Java
- Daimond PU College** Basvakalyan, India
Pre-University College - PCMCS; Percentage: 93.5 May 2021 - March 2023
Courses: Physics, Chemistry, Mathematics, Computer Science

SKILLS HIGHLIGHTS

- Languages:** C, C++, JAVA, PYTHON ,HTML
- Tools:** GIT, GITHUB, MySQL, MongoDB
- Platforms:** Linux, Windows, Docker, Microsoft Azure, AWS, GCP
- Soft Skills:** Event Management, Writing,, Time Management

PROJECTS

- Smart Lost and Found Management System:** Web-based application that allows users to report and manage lost and found items on a centralized platform. Users can register lost or found items, search items by name or location, and request claims. Includes user authentication and database storage for efficient item tracking. Tech: Python, Flask, SQLite, HTML, CSS, Git (March '26)
- Web Application Load Balancer using Microsoft Azure:** Configured Azure Load Balancer with multiple virtual machines to distribute web traffic efficiently, improving application availability and scalability. Implemented load balancing rules and monitored performance using Azure Monitor to ensure high availability and reliability of the web application. Tech: Microsoft Azure, Azure Virtual Machines, Azure Load Balancer, Azure Monitor (June '25)
- Cloud Storage with AI Optimization:** Developed a cloud storage solution that uses AI-based optimization to manage and organize stored data efficiently. The system analyzes storage usage patterns to optimize file storage, improve retrieval speed, and reduce storage overhead. Tech: Python, Microsoft Azure, AI Algorithms, Cloud Storage (jan '25)

CERTIFICATES

- Microsoft Azure Fundamentals (AZ-900)**
Microsoft certification validating foundational knowledge of Azure cloud services and cloud computing concepts. (2026)
- DevOps on AWS**
Completed Coursera certification covering DevOps practices, CI/CD, automation, and cloud deployment using AWS. (2025)
- Python Essentials 1**
Completed Python Essentials 1 certification covering Python fundamentals including variables, data types, control structures, functions, and basic programming concepts. (2025)
- Introduction to Agile Development and Scrum**
Completed certification covering Agile principles, Scrum framework, sprint planning, backlog management, and collaborative software development practices. (2025)

EXTRACURRICULAR ACTIVITIES

- Event volunteer at ALF organized by Alliance University** Bangalore
Worked as Content and Documentation Lead, responsible for managing event content and documentation. (2025).
- India AI Impact Buildathon – AI Impact Summit**
Participated in a nationwide AI innovation challenge organized by GUVI and HCL as part of AI Impact Summit 2026.
